| Inspired by an antique cotton fragment we designed a smaller repeat patterned fabric. Originally part of Japanese Indigo workwear, the earthy colourways of this print reflect its Japanese heritage. The faded nature of the print is symbolic of the water-coloured medium it was designed and resonate with its narrative. |                                                                                                                                                                                                                                                              |                                                                                       |                                                                                                                                                                                                                                                              |

### Washing and Care Advice

We recommend dry clean for all our fabrics.

In the event of washing, please use a non-colour-enhancing liquid detergent, ensuring that washing is conducted at low temperature of 30 – 40 degrees. Fabric should not be tumble dried and should be re shaped before allowing to dry flat.

If ironing, then we advise a low temperature, and that ironing should be on the reverse side.

For more information about the textiles and work of Studio Supple please get in touch.
